

Java

```
class Solution {  
    public boolean canMakeSubsequence(String str1, String str2) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string} str1  
 * @param {string} str2  
 * @return {boolean}  
 */  
var canMakeSubsequence = function(str1, str2) {  
  
};
```

C++

```
class Solution {  
public:  
    bool canMakeSubsequence(string str1, string str2) {  
  
    }  
};
```

C#

```
public class Solution {  
    public bool CanMakeSubsequence(string str1, string str2) {  
  
    }  
}
```
